27G

JD3834.27

Micropinza ILM, per rimozione membrana limitante interna, **27G**

27G ILM, internal limiting membrane removal forceps

JD3839.27

Micropinza, **27G** retta, presa "coccodrillo"

27G retinal "serrated" forceps

25G

JD3834.25

Micropinza **ILM**, per rimozione membrana limitante interna, **25G**

25G ILM, internal limiting membrane removal forceps

JD3839.25

Micropinza, **25G** retta, presa "coccodrillo"

25G retinal "serrated" forceps

JD3842.25

Microforbice vitreale, **25G** retta

25G vitreous scissors, straight jaws

23G

JD3834.23

Micropinza **ILM**, per rimozione membrana limitante interna, **23G**

23G ILM, internal limiting membrane removal forceps

JD3839.23

Micropinza, **23G** retta, presa "coccodrillo"

23G retinal "serrated" forceps

JD3842.23

Microforbice vitreale, **23G** retta

23G vitreous scissors, straight jaws

27G RETINAL INSTRUMENTS REUSABLE

J3834.27

Micropinza **ILM**, per rimozione membrana limitante interna, **27G**, (mod. su base Eckardt)

27G ILM forceps, for removal internal limiting membrane (based on Eckardt design)

J3839.27

Micropinza, retta, presa seghettata, **27G**

27G retinal forceps, straight, serrated Jaws

J3840.27

Microforbice vitreale, curva, **27G**

27G vitreous scissors, lightly curved jaws

25G RETINAL FORCEPS

J3834.25

Micropinza **ILM**, per rimozione membrana limitante interna, **25G**, (mod. su base Eckardt)

25G ILM forceps, for removal internal limiting membrane (based on Eckardt design)

Mariotti
J3834.1.25

Micropinza **ILM**, per rimozione membrana limitante interna, **25G**, presa angolata

25G ILM forceps, angled, grasping tips

J3838.25

Micropinza, end gripping, con presa delicata in punta, **25G**

25G retinal forceps, delicate end gripping

J3839.25

Micropinza, retta, presa seghettata, **25G**

25G retinal forceps, straight, serrated jaws

25G RETINAL FORCEPS

S.Rizzo
J3821.25L

Pinza **ILM**, con presa tipo pinza corneale, 1X2 denti e piano di presa, **25G**

25G ILM forceps, with plug type corneal forceps, 1x2 teeth and gripping plane

Tano
J3827.25

Micropinza **ILM** per membrane e limitante interna, **25G**

25G ILM retinal forceps, for membranes

Zenoni
J3828.25

Micropinza **ILM** per membrana limitante interna ed epiretinica, angolata 175, **25G**

25G ILM retinal forceps, for epiretinal membranes, 175° angled, delicate jaws

25G RETINAL SCISSORS

J3840.25

Microforbice vitreale, curva, **25G**, manico in **titanio**

25G vitreous scissors, lightly curved jaws, **titanium** handle

M.Romano
J3843.25

25G vertical pick-scissors disegnato per afferrare saldamente e tagliare le membrane aderenti alla retina che creano la trazione epiretinica. Utile anche per tecniche bimanuali quali la delaminazione e la segmentazione delle membrane proliferative, manico in **titanio**

25G vertical pick-scissors designed to pick strongly adherent retinal tractional membranes and to cut the epiretinal traction at the same time. This instrument is also very useful in bimanual delimitation and segmentation of proliferative membrane, **titanium** handle

J3842.25

Microforbice vitreale, retta, **25G**, manico in **titanio**

25G vitreous scissors, straight jaws, **titanium** handle

23G RETINAL FORCEPS/SCISSORS "L" large handle color code reusable

J3834.23L

Micropinza per **ILM**, **23G**, nuovo manico in **titanio**, Ø 7.5 mm (modello su base Eckardt)

23G ILM microforceps, new blue **titanium** handle, Ø 7.5 mm (based on Eckardt design)

J3839.23L

Micropinza **23G**, retta, presa seghettata, nuovo manico in **titanio**, Ø 7.5 mm

23G microforceps, straight, serrated jaws new blue **titanium** handle, Ø 7.5 mm

Rizzo
J3833.23L

Micropinza per **ILM 23G**, con presa tipo Eckardt e piani seghettati, nuovo manico in **titanio**, Ø 7.5 mm

23G ILM microforceps, Eckardt style with serrated platforms, new blue **titanium** handle, Ø 7.5 mm

V. Piccirillo
J3876.23L

Holder retinico **23G**, presa ampia ed atraumatica, utile per la chirurgia bimanuale retinica, peeling di membrane durante il trattamento "**PVR**", retinotomia, chirurgia sottoretinica e manipolazione di patch retinocoroidali, nuovo manico in **titanio**

23G retinal holder with wide atraumatic holding platforms. For bi-manual retinal surgery, peeling of membranes in "**PVR**" treatment, retinotomy, subretinal, surgery and patch manipulation, new blue **titanium** handle

J3870.23L

Microforbice, **23G**, punte leggermente curve, taglio orizzontale, nuovo manico in **titanio**, Ø 7.5 mm, (per sistema TROCAR)

23G microscissors, slightly curved jaws, horizontal cut, new yellow **titanium** handle, Ø 7.5 mm (for TROCAR system)

23G RETINAL FORCEPS

J3834.23

Micropinza **ILM**, per rimozione membrana limitante interna, **23G**, (mod. su base Eckardt)

23G ILM forceps for membrane removal, (based on Eckardt design)

23G RETINAL FORCEPS

Mariotti
J3834.1.23

Micropinza **ILM**, per rimozione membrana limitante interna, **23G**, presa angolata

23G ILM forceps for membrane removal, angled grasping tips

J3839.23

Micropinza, **23G**, retta, presa seghettata

23G retinal forceps, straight, serrated jaws

Tano
J3827.23

Micropinza **ILM** per membrane e limitante interna, **23G**

23G ILM and macular forceps

Zenoni
J3828.23

Micropinza **ILM** per membrana limitante interna ed epiretinica, angolata 175°, **23G**

23G ILM retinal forceps for epiretinal membranes, 175° angled, delicate jaws

23G RETINAL SCISSORS

J3870.23

Microforbice, **23G**, poco curva

23G vitreous scissors, lightly curved jaws

J3842.23

Microforbice vitreale, **23G**, retta

23G vitreous scissors, straight jaws

J3843.23

Microforbice vitreale, "**taglio verticale**" **23G**, a **ghigliottina**, con lame 45°

23G MPC vitreous scissors, 45° **vertical cutting** action

J3848.23

Microforbice vitreale, **23G**, lame angolate

23G vitreous scissors, angled jaws

J3834

Micropinza **ILM 20G** per rimozione membrana limitante interna, manico in **titanio** (mod. su base Eckardt)

20G ILM forceps, **titanium** handle (based on Eckardt design)

J3839

Micropinza, **20G**, retta, presa seghettata, manico in **titanio**

20G retinal forceps, straight, serrated jaws, **titanium** handle

J3823

Micropinza **20G** per traslocazione retinica, apici ad anello

20G microforceps for retinal translocation, with ring

V. Piccirillo
J3876

Holder retinico **20G** con presa ampia atraumatica, utile sia per la chirurgia bimanuale retinica (peeling di membrane durante le procedure di trattamento di "PVR", presa della retina durante procedure di retinotomia) che per la chirurgia sottoretinica (asportazione di membrana sottoretiniche, manipolazione di patch retinocoroidali), manico in **titanio**

20G retinal holder with wide atraumatic holding platforms. For bi-manual retinal surgery (peeling of membranes in "PVR" treatment, grasping of the retina in retinotomy) as well as for subretinal surgery (subretinal membranes removal, retinochoroidal patch manipulation), **titanium** handle

Mariotti
J3834.1

Micropinza **ILM 20G** per membrana limitante interna, con presa angolata, manico in **titanio**

20G ILM forceps, with angled grasping tips, **titanium** handle

J3834.2

Micropinza **ILM 20G** per membrana limitante interna, **presa ultra fine** e delicata, manico **titanio**

20G ILM forceps, delicate and fine grasping tips, **titanium** handle

20G RETINAL FORCEPS "L" large handle color code

J3834L

Micropinza per **ILM 20G**, nuovo manico in **titanio**, Ø 7.5 mm (modello su base Eckardt)

20G ILM microforceps, new blue **titanium** handle, Ø 7.5 mm (based on Eckardt design)

J3839L

Micropinza **20G**, etta, presa seghettata, nuovo manico in **titanio**, Ø 7.5 mm

20G microforceps, straight, serrated jaws new blue **titanium** handle, Ø 7.5 mm

Rizzo
J3833L

Micropinza per **ILM 20G**, con presa tipo Eckardt e piani seghettati, nuovo manico in **titanio**, Ø 7.5 mm

20G ILM microforceps, Eckardt style with serrated platforms, new blue **titanium** handle, Ø 7.5 mm

20G RETINAL SCISSORS

↔
taglio orizzontale

J3840

Microforbice vitreale, **20G**, curva, taglio orizzontale, manico in **titanio**

20G vitreous scissors, lightly curved jaws, horizontal cut, **titanium** handle

Schirru
J3840.2

Microforbice vitreale curva, **20G**, taglio orizzontale, delicata, lame da 4 mm, manico **titanio**

20G vitreous scissors, curved, horizontal cut, delicate, 4 mm blades, **titanium** handle

J3842

Microforbice vitreale, **20G**, retta, manico in **titanio**

20G vitreous scissors, straight jaws, **titanium** handle

J3848

Microforbice vitreale, **20G**, con lame angolate, manico in **titanio**

20G vitreous scissors, angled jaws, **titanium** handle

20G RETINAL MPC SCISSORS VERTICAL CUT CONVENTIONAL HANDLE

J3843

Microforbice vitreale, **20G**, a **ghigliottina**, con lame 45°, manico in **titanio**

20G vitreous scissors, 45° vertical cutting action, **titanium** handle

J3844

Microforbice vitreale, **20G**, a **ghigliottina**, con lame 90°, manico in **titanio**

20G vitreous scissors, 90° vertical cutting action, **titanium** handle

J3841

Microforbice vitreale, **20G**, curva, **taglio verticale**, manico in **titanio**

20G vitreous scissors, lightly curved jaws, vertical cutting action, **titanium** handle

CORPI ESTRANEI E BIOPSIA/FOREIGN BODY AND BIOPSY

Pellegrini
J3877

Pinza tipo punch da **25G**, per biopsia di neoformazioni retiniche e coroideali. Fornisce materiale idoneo per esami citologici e micro-istologici, manico in **titanio**

25G biopsy microforceps, for retinal and choroidal neoformations. It provides suitable tissue for cytologic and micro cytologic examination, **titanium** handle

J3865

Micropinza a tre branche, **20G**, per corpi estranei endovitreali, azione inversa, manico in **titanio**

20G three-pronged foreign body endovitreous grasper, reverse-action, **titanium** handle

J3867

Pinza per corpi estranei, **18G**, branche da 5 mm, superficie interna trattata per presa sicura, azione diretta, manico in **titanio**

18G foreign body forceps with 5 mm tips, tungsten carbide coated tips for secure gripping, direct-action **titanium** handle

J3868

Micropinza magnete, stelo conico **14-18G**, per corpi estranei metallici, azione diretta, manico in **titanio**

14-18G magnet microforceps for foreign body, tapered shaft, direct-action, **titanium** handle

Grange
J3875

Micropinza per biopsia nei tumori bulbari, **20G**, manico in **titanio**

20G biopsy microforceps for tumours, **titanium** handle

LENTI MONOUSO/DISPOSABLE LENSES

8 PER BOX STERILE

JD4811

LENTE PIATTA

La lente permette una visione del polo centrale potere posteriore e del vitreo in occhi fachici o pseudofachici. Ideale per fotografia. FOV 36°, ingrandimento 1,02x

FLAT LENS

The lens allows the view of the central posterior pole and vitreous in phakic and pseudophakic eyes.

FOV 36°, 1,02x magnification

FLAT LENS

JD4805

LENTE MAGNIFYING PER POLO POSTERIORE CONVESSA

Per esaminare in modo dettagliato le membrane retiniche durante la loro manipolazione, in occhi fachici e pseudofachici. FOV 30°, ingrandimento 1,49x

MAGNIFYING LENS

For detailed examination and minute surgical manipulation of retinal membranes in phakic and pseudophakic eyes.

FOV 30°, 1,49x magnification

MAGNIFYING LENS

JD4803

LENTE CON AMPIO CAMPO VISIVO

La superficie concava facilita la visione del polo centrale posteriore e del vitreo in occhi fachici o pseudofachici, permettendo un campo di visione di 48°

WIDE FIELD

Concave anterior surface facilitates a 48° field of view of the central posterior pole and central vitreus in phakic and pseudophakic eyes

WIDE FIELD

JD4807

LENTE PRISMATICA - 30°

Permette una visualizzazione del perimetro posteriore del fondo e del vitreo oltre la linea equatoriale con minima distorsione in occhi fachici, afachici e pseudofachici.

FOV 33°, ingrandimento 1.02x

PRISMA LENS - 30°

Provides visualization of the posterior peripheral fundus and vitreous beyond the equator with minimal distortion in phakic and pseudophakic eyes.

FOV 33°, 1.02x magnification

PRISMA 30°

JD4802

LENTE BICONCAVA

Facilita la visione del fondo con l'uso di aria nella cavità vitreale, in occhi fachici e pseudofachici.

FOV 25°, ingrandimento 0.80x

BICONCAVE LENS

It facilitates the view of the fundus in an air-filled vitreous cavity in phakic and pseudophakic eyes.

FOV 25°, 0.80x magnification

BICONCAVE

VITRECTOMY LENSES REUSABLE

J4805

lente piatta

La lente permette una visione del polo centrale posteriore e del vitreo in occhi fachici o pseudofachici. Ideale per fotografia. FOV 36°, ingrandimento 1,02x

flat lens

The lens allows the view of the central posterior pole and vitreous in phakic and pseudophakic eyes. FOV 36°, 1,02x magnification

J4806

lente prismatica - 20°

Permette una visualizzazione del perimetro posteriore del fondo e del vitreo oltre la linea equatoriale con minima distorsione in occhi fachici, afachici e pseudofachici

prismatic lens - 20°

Provides visualization of the posterior peripheral fundus and vitreous beyond the equator with minimal distortion in phakic and pseudophakic eyes

J4807

lente prismatica - 30°

Permette una visualizzazione del perimetro posteriore del fondo e del vitreo oltre la linea equatoriale con minima distorsione in occhi fachici, afachici e pseudofachici

prismatic lens - 30°

Provides visualization of the posterior peripheral fundus and vitreous beyond the equator with minimal distortion in phakic and pseudophakic eyes

J4808

lente prismatica- 50°

in quarzo, - 60D

prismatic lens - 50°

quartz, - 60D

J4802

lente biconcava

Facilita la visione del fondo con l'uso di aria nella cavità vitreale, in occhi fachici e pseudofachici. FOV 25°, ingrandimento 0,80

biconcave lens

It facilitates the view of the fundus in an air-filled vitreous cavity in phakic and pseudophakic eyes. FOV 25°, 0,80x magnification

J4805.5

WideView HRI - 116D

Permette un campo di visione di 48° per la visualizzazione del polo centrale posteriore e del vitreo centrale in occhi fachici e pseudofachici

HRI (High Refractive Index) WideView lens -116D

Facilitates a 48° field of view when visualizing the central posterior pole and central vitreous in phakic and pseudophakic eyes

RINGS

J4801.1

Ring in silicone, **riutilizzabile**
acquistabile in lotti da 10 unità

Silicone ring, **reusable**
to be purchased in lots of 10 items

JD4801.1/10

Ring in silicone, **monouso**
Conf. da 10 pz. sterili

Silicone ring, **disposable**
10 sterile pieces/box

STERILE EO

J2092

Anello inox per lenti da vitrectomia, a due braccia

Stainless steel ring for lens, with two arms

J3249

Pinza per lenti da vitrectomia

Lens holder

RETRATTORI FLESSIBILI/FLEXIBLE IRIS RETRACTORS

5 PER BOX STERILE

JD4900

Retrattori flessibili, 1
confezione da 5 pezzi, monouso
Flexible iris retractors,
1 pack of 5 hooks, disposable

STERILE EO

JD4900

J2294.58

Marcatore corneale per marcare i 4 punti di
inserzione dei retractor iridei. Permette un
posizionamento predefinito in grado di
dilatare l'iride con forma trapezoidale,
con ampio spazio di manovra in zona distale

Corneal marker to mark on the cornea 4
insertion points of IRIS retractors. It allows
a default positioning able to dilate the iris
with trapezoidal shape, with ample room for
maneuver in the distal area

26G/25G/23G PICK AND SPATULAS

26G

Zenoni
J2437.25A

Pick per membrane fibrovascolari epiretinali
26G, apice acuto, per trocar, angolato 160°

26G membrane pick, pointed tip,
for trocar, 160° angled

26G/25G/23G PICK AND SPATULAS

25G

M.Romano
J2424.25A

pick rake-scraper 25G per separare le membrane dalla superficie retinica. Le tre punte smusse, consentono, attraverso un "massaggio retinico", di individuare il giusto piano di clivaggio tra la membrana proliferativa e la retina

25G blunt retinal rake-scraper is designed to smoothly separate the tractional membranes from the retinal surface. The three blunt tips allow the surgeon to find, throughout a "retinal massage", the right cleavage plane between the retina and the proliferative membrane

J2423.25A

Spatola smussa per peeling e stripping membrane epiretينية **25G**, per trocar

25G blunt spatula for peeling and stripping retinal membranes, for trocar

23G

J2430.23A

Pick per membrane **23G**, angolato 90°, lunghezza 0.4 mm, smusso, mod. Weiss

23G membranes pick, 90° angled, 0.4 mm long, blunt, design: Weiss

Zenoni
J2437.23A

Pick per membrane fibrovascolari epiretينية **23G** apice acuto, per trocar, angolato 160°

23G membrane pick, pointed tip, for trocar, 160° angled

J2423.23A

Spatola smussa per peeling e stripping membrane epiretينية **23G**, per trocar

23G blunt spatula for peeling and stripping retinal membranes, for trocar

J2428.23A

Spatola per peeling membrane epiretينية **23G**, angolata 160°, bordi taglienti

23G spatula for peeling epiretinal membranes, angled 160°, sharp edges

RETINAL SPATULA FOR ANTERIOR SEGMENT

J2408A

Spatola da vitreo con dischetto distale

Vitreous spatula with small disc-shaped tip

Barraquer
J2408

Spatola Barraquer, vitreo con dischetto distale

Barraquer vitreous spatula, disc-shaped tip

J2409.1A

dischetto distale **destro**

half-disc shaped tip on **right side**

J2409.2A

dischetto distale **sinistro**

half-disc shaped tip on **left side**

20G PICK AND SPATULAS

J2430.1A		Pick per membrane, 20G , angolato 90°, lunghezza 0.20 mm, smusso, mod. Weiss	20G membrane pick, 90° angled, 0.20 mm long, blunt, design: Weiss
J2430.2A		Pick per membrane, 20G , angolato 90°, lunghezza 0.40 mm, smusso, mod. Weiss	20G membrane pick, 90° angled, 0.40 mm long, blunt, design: Weiss
J2430.11A		Pick per membrane, 20G , angolato 120°, lunghezza 0.20 mm, smusso, mod. Weiss	20G membrane pick, 120° angled, 0.20 mm long, blunt, design: Weiss
J2430.12A		Pick per membrane, 20G , angolato 120°, lunghezza 0.40 mm, smusso, mod. Weiss	20G membrane pick, 120° angled, 0.40 mm long, blunt, design: Weiss
DeMolfetta-Zenoni J2437.1A		Pick per membrane fibrovascolari epiretينية, 20G , angolato, apice acuto, bordi smussi	20G membrane pick, angled, sharp tip
J2437.7A		Pick per incisione retinica, 20G , sezione triangolare Δ , angolato 135°, apice 0.25 mm, braccio da 5 mm	20G pick for retinal incisions, triangular-shaped section Δ , angled 135°, 0.25 tip size, 5 mm angle to tip
			
J2423A		Spatola smussa per peeling e stripping membrane epiretينية, 20G	20G blunt spatula for peeling and stripping retinal membranes
J2424A		Spatola a rastrello per pulizia residui, 20G , denti smussi	20G membrane rake, blunt teeth
J2426A		Spatola per manipolazione e massaggio della retina, 20G , punta da 2.5 mm, bottonuta	20G spatula knob for retinal massage and manipulation, 2.5 mm long, blunt, bulbous tip
J2428A		Spatola per peeling e manipolazione membrane epiretينية, 20G , corta, punta smussa	20G spatula for peeling and manipulation of membranes, short, blunt tip
J2429A		Pick manipolazione membrane epiretينية, 20G , punta smussa da 0.3 mm	20G membrane manipulator pick, 0.3 mm, blunt tip

BACKFLUSH HANDLES AND NEEDLES

J3780

Backflush per aspirazione passiva,
in **titanio blu**

blue titanium handle

J3780.1

Backflush per aspirazione passiva,
in **titanio viola**
(per migliore riconoscibilità con punte diverse)

violet titanium handle

J3770

Backflush per aspirazione attiva,
in **titanio**

Active aspirating backflush,
titanium handle

J3774

Serbatoio di ricambio per J3770
Disponibile solo in lotti da 6 pz.

Silicone reservoir, for J3770
Available only in lots of 6 pcs.

- . Blefarostato reversibile, valve piene. in polimero medicale / Reverse speculum, solid blade. Medical polymer. Latex-free
- . 5 bastoncini assorbenti a sigaretta / 5 cellulose absorbent sticks
- . 5 compresse di garze TNT 10x10 cm - 4 strati / 5 TNT gauze 10x10 cm - 4 layers
- . Pinza corneale, 1x2 denti retti da 0.20 mm, con piani prendifilo, mod. Bonn
Corneal Bonn forceps, 1x2 straight teeth, 0.20 mm, with tying platform
- . Marcatore 3,5-4 mm / Marker 3,5-4 mms
- . Ciotola graduata 500 cc / Graduated bowl, 500 cc
- . Spugna con manico / Handle sponge
- . Telo paziente SMS 100x120 cm, film inciso e tasca laterale / SMS ophthalmic drape, 100x120 cm with incision film and side pocket
- . Telo standard 150x150 cm / Standard drape, 150x150 cm

VITREJECT® SAFETY NEEDLE
PN0406-01

Ago OCUSAFE® da 33G x 8 mm, indicato per iniezione intravitreale, grazie al basso contenuto di particolato. Il meccanismo **"Low Dead Space"** consente di ridurre lo spreco di farmaco ed evitare le bolle d'aria nella soluzione iniettata. La calotta scorrevole dell'ago presenta proiezioni radiali all'estremità di contatto con il tessuto che localizzano il sito di iniezione a 3,5 mm - 4 mm quando è allineato con un punto di riferimento tissutale, come il limbus corneo-sclerale, garantendo la precisione e la coerenza del sito di iniezione

STERILE EO

OCUSAFE® needle, 33g x 8 m, Low Dead Space, indicated for Intravitreal Use thanks to the low particulate content. The **"Low Dead Space"** mechanism allows to reduce drug waste and avoid air bubbles in the injected solution. Needle's sliding cap has radial projections at its tissue-interfacing end that localize the injection site at 3.5 mm - 4 mm when aligned with a tissue landmark, such as corneo-scleral limbus, ensuring injection site precision and consistency

VITREJECT® OPTHALMIC SYRINGE
PN0292-01
LDS – Low Dead Space

Siringa monouso indicata per iniezioni intravitreali (solo siringa, senza ago). Sistema Luer Lock. Capacità 1 ml, graduazione 0,01 ml. **Low Dead Space** (LDS; ≤ 0.023 ml). **Realizzata senza lubrificante silconico**

STERILE EO

Disposable syringe indicated for intravitreal injections (Syringe only, no needle). Luer Lock system. 1 ml capacity, 0,01 ml graduation. **Low Dead Space** (LDS; ≤ 0.023 ml). **Manufactured without silicone lubricant**

VITREJECT® OPTHALMIC SYRINGE
PN0292-02
Standard Dead Space

Siringa monouso indicata per iniezioni intravitreali (solo siringa, senza ago). Sistema Luer Lock. Capacità 1 ml, graduazione 0,01 ml. **Standard Dead Space** (≤ 0.07 ml). **Realizzata senza lubrificante silconico**

Disposable syringe indicated for intravitreal injections (Syringe only, no needle). Luer Lock system. 1 ml capacity, 0,01 ml graduation. **Standard Dead Space** (≤ 0.07 ml). **Manufactured without silicone lubricant**

Caratteristiche principali:

- * Bassa endotossina ($< 0,2$ EU/dispositivo, misurata su ogni lotto di produzione)
- * Bassi residui di EO/ECH (adatti all'uso intravitreale)
- * Caratterizzazione chimica (E&L), valutazione del rischio tossicologico e valutazione del rischio biologico (adatti all'uso intravitreale)
- * Test di biocompatibilità per uso intraivtreale (cioè test oculari, intraoculari e intravitreali su animali)
- * Basso contenuto di particolato (superato USP<788>/<789>)

Main features:

- * Low endotoxin (< 0.2 EU/device, measured on every production lot)
- * Low EO/ECH residuals (suitable for intravitreal use)
- * Chemical characterization (E&L), Toxicological Risk Assessment and Biological Risk Assessment (suitable for intraivtreale use)
- * Biocompatibility testing for intraivtreale use (i.e. ocular, intraocular and intravitreal testing in animals)
- * Low Particulate Matter (USP<788>/<789> passed)

OCUSAFE® NEEDLE
PN0405-01

Ago OCUSAFE® da 33G x 8 mm, indicato per iniezioni intravitreali, grazie al basso contenuto di particolato. Il meccanismo **"Low Dead Space"** consente di ridurre lo spreco di farmaco ed evitare le bolle d'aria nella soluzione iniettata

STERILE EO

OCUSAFE® needle, 33G x 8 mm, Low Dead Space, indicated for Intravitreal Use thanks to the low particulate content. The **"Low Dead Space"** mechanism allows to reduce drug waste and avoid air bubbles in the injected solution

Conjunctival forceps, **straight**, Hoskin tips, with tying platform

P. Vinciguerra
J4199E

Port'aghi, lunghezza 125 mm, curvo, con sistema "Twister" (anti-incarcerazione della sutura), in **titanio**. Nuova impugnatura con tipologia di chiusura "a pinza" che riduce la corsa nel movimento di chiusura, rispetto al classico sistema a molla

SnagFree Twister needle holder, delicate tips, overall length: 125mm, **titanium**. New handle with "cross-action forceps style" mechanism which reduces the stroke of the closing action compared to the traditional spring system

Consigliato per suture da 8-0 a 10-0

Recommended for 8-0 to 10-0 sutures

J4198

Port'aghi Twister, curvo, da 128 mm, anti-incarcerazione della sutura, in **titanio**

SnagFree Twister needle holder, curved, overall length: 128 mm, **titanium**

Consigliato per suture da 7-0 a 9-0

Recommended for 7-0 to 9-0 sutures

Castroviejo
J4060

Port'aghi in acciaio, robusto, retto, **senza arresto**, da 145 mm

Stainless steel needle holder, straight, **without lock**, overall length: 145 mm

J4061

curvo, **senza arresto**, da 145 mm
Consigliati per suture da 4-0 a 7-0

curved, **without lock**, overall length: 145 mm
Recommended for 4-0 to 7-0 sutures

J4064

Port'aghi robusto, retto, **con arresto**, da 145 mm

Needle holder, strong, straight, **with lock**, overall length: 145 mm

J4065

curvo, **con arresto**, da 145 mm

curved, **with lock**, overall length: 145 mm

J3270

Pinza serrafile e per punti, retta,
con piani da 7 mm

Consigliata per suture da 6-0 a 8-0

Tying and stitch forceps, straight,
with 7 mm tying platforms

Recommended for 6-0 to 8-0 sutures

J3272.1E
titanium version EVOLine

Pinza serrafile per sutura corneale, retta,
con piani delicati da 6 mm

Consigliata per suture da 8-0 a 11-0

Tying forceps, straight, with 6 mm tying
platforms, very delicate

Recommended for 8-0 to 11-0 sutures

J3272.1

Pinza serrafile per sutura corneale, retta,
con piani delicati da 6 mm

Consigliata per suture da 8-0 a 11-0

Tying forceps, straight, with 6 mm tying
platforms, very delicate

Recommended for 8-0 to 11-0 sutures

J3276.1E
titanium version EVOLine

Pinza serrafile, angolata, con piani da 11 mm
Consigliata per l'impianto di lenti rigide

Tying forceps, angled, with 11 mm tying platform
Recommended for implantation of rigid lenses

J3276.1

Pinza serrafile, angolata, con piani da 11 mm
Consigliata per l'impianto di lenti rigide

Tying forceps, angled, with 11 mm tying platform
Recommended for implantation of rigid lenses
