

**Tailor-made :** Build your own instrument set from a portfolio of 1200 instruments which allows surgeons to prepare ahead of time for success

**Simplify :** Reduce number of SKU's which contributes to a better work environment for all stakeholders

**Constant quality :** HASA Optix offers a quality equivalent to reusable devices allowing surgeons to use them constantly

**Environmentally friendly :** Instrument sets are presented in a paper pouch avoiding heavy plastic inserts (only one pack and one sterilization)

**Circular economy :** We are building a recycling program to give a second life to the stainless steel our instruments are made of

**Cost controlling :** We are offering integrated solutions to allow the circulation of a fixed cost per surgical act

\*Staar's lens used for refractive surgery is called an implantable collamer lens or "ICL". They are distributed in over more than 75 countries. Moreover more than 1.000.000 ICL lenses have been placed worldwide

\*\*Are you placing a Toric ICL lens? We recommend you the Mendez gauge instrument.
